

**Classifying Two-Dimensional Figures**  
*Independent Practice*

1 Draw a line to cut the parallelogram into 2 triangles.

2 Draw 2 lines to cut the square into 4 triangles.

3 What will a square and a triangle make when joined? Draw it.

Name \_\_\_\_\_ Date \_\_\_\_\_

4 I have 4 sides. I have 4 angles. I have 2 sets of sides that are the same length. Which shape am I? Draw it.

5 I have fewer than 4 sides. I have 3 angles. What shape am I? Draw it.

6 Complete the table.

Shape	Number of Sides	Number of Angles
	3	3
		
	4	4
